A Report on Extension Lecture Topic - Nature and Nano Technology Fundamental Concepts, Developments and Scope.

Under XII Plan of University Grants Commission

By

Department of Physics Govt. R.D. Girls College, Bharatpur (Raj.)

Topic - Nature and Nano Technology : Fundamental Concepts, Developments and scope.

Under the 12th plan of UGC, an extension lecture was organised by the Deptt. of Physics on 21st January 2017. The principal of the college Dr. A.K. Bansal presided over this academic programme and Prof. M.S. Gaur, Dean R&D Hindustan College of Science and Technology, Farah (Mathura) U.P. was the guest speaker. The topic of the lecture was "Nature and Nano Technology : Fundamental Concepts, Developments and scope".

Prof. M.S. Gaur, while delivering his valuable lecture, said that Nanoscience is not physics, chemistry engineering or biology but it is all of them. Nanoscience is not only study of phenomenon of a nanometer scale, but also study of science and engineering exist at the level of 1 to 100 nanometers. Atoms are a few tenths of a nanometer in diameter and molecules are typically a few nanometers in size. Nanotechnology is the understanding and control of matter at dimensions of roughly 1 to 100 nanometers, where unique phenomena enable novel applications. Nanoscience will change the nature of almost every human-made object in the next centuary. This lecture deals with origin, history, preparation future scope and application of nano materials. The origin of nanoscience will be well described with the help of several examples in nature. He has demonstrated the application of nano materials in the field of Agriculture, Medical, Space and day to day life.

The students were highly benefitted by this lecture. The Vice-principal Smt. Raj Laxmi Gautam and other staff members keenly participated in the programme. Dr. Shashi Prabha Gupta Coordinated the programme and in the last Dr. K.K. Gupta gave a vote of thanks to Speaker and participants.

Acknowledgement

This extension lecture was funded by UGC under Grant-in-Aid General (31) of XII Plan. The Department of Physics extends sincere thanks to UGC for this grant.
