

Special Programmes for advanced learners and slow learners

The college is affiliated to M.D.S University and the students are only assessed during the annual examination conducted by the affiliating university. But the college makes various efforts to assess the learning levels of students starting soon after the admission process. The mentors start the process of identification of the students' learning levels, interests, articulation abilities and prospects through interactions in class and laboratories, departmental seminars and performance level in class tests. Class tests for UG. These internal tests help the teachers a lot in assessing the learning levels of students. This helps the students to analyze their preparations and know the problem areas related to subject content. Feedback is also collected from related subject teachers and from the admission committee. This feedback helps in categorization as advanced learners and slow learners. After the process of identifying the mentors convey this information to the faculty and respective committees. It is also mandatory for students of first year undergraduate program to enroll in one of the extension activities viz NSS, Ranger/Rover, Women Cell etc. as per their aptitude and the mentors help them in this selection. After the completion of the admission process, the ball starts rolling and certain steps are carried out to enhance skills for both types of learners.

Some of the measures taken for the slow learners are:

1. Extra classes for problem-solving and course content
2. Modifying teaching strategies as per needs
3. Group study supervised by the teacher
4. Personal counseling
5. Parent interaction
6. Assignments and study notes provided by teachers
