G. B. Pant S.S. Institute,  
Jhusi, Prayagraj. U.P.

**Ms. Arushi Rana**  
Assistant Professor  
Banasthali Vidhyapeeth,  
Rajasthan

### CONCEPT

Over the centuries, people have described geography as rivers, mountains, plains, maps and so forth. While these things are definitely a part of the discipline, there is far more complexities. Geography is unique in bridging the social sciences and the natural sciences. Geographers use many tools and techniques in their work and geographic technologies are important for understanding our complex world, but there is still a lack of application of this knowledge for societal benefit.

The need of the hour for geography is to explore how humans have understood, used, and changed the surface of Earth and vice versa. Topics like migration patterns, population, political ecology, environmental justice, urbanization, biosecurity, food risk, human-nonhuman relations, nature conservation and more must be included to make geography as a welfare discipline. The webinar revolves around the exchange of knowledge among the teaching fraternity, researchers and students, amidst the "Work from Home" environment created due to the COVID-19 Pandemic
