### ABOUT THE WEBINAR

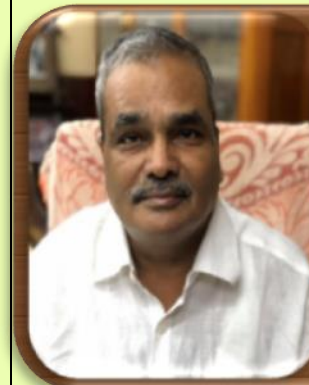

In the recent past the scientific world has seen a fast growth in the field of Theoretical Physics and Applied Physics. This growth has resulted in many new areas of scientific research such as biomedical science, learning and teaching. This Webinar offers interactive discussion, guidance and advice from fellow physicists in the present environment of work from home.

This Webinar will offer different aspects and applications of physics in different areas. The main aim of this event is to bring individuals together from miscellaneous institutes to examine progress, exchange of thoughts and philosophies in the field of Physics.

We believe that such endeavors will be helpful for sharing the knowledge in present scenario of Covid-19 pandemic
