

## MAHARANA PRATAP GOVERNMENT COLLEGE, CHITTORGARH (RAJ.)

---

### Two institutional best practices 2017-18

#### 1. Introduction of the Dishari Scheme:

For the betterment of educated youth and thus paving the way for them to acquire proper jobs in government and private sector; the novel Dishari scheme was officially launched by the Commissioner of college education, Government of Rajasthan. The main objective of this scheme was to provide free coaching classes to the needy college students who are preparing for competitive examinations. These classes were arranged and managed by the respective college, it would be worth mentioning that the Maharana Pratap Government College Chittorgarh was among the best performing colleges in the successful implementation of this scheme, the subject experts of the college on honorary basis gave consent for free coaching classes. Under this scheme classes of Botany, Chemistry, Zoology, Geography and English (language proficiency) were conducted by the College and more than 200 students benefitted from it.

#### 2. Student Parliament:

The Student Parliament is a non-statutory student body, whose representatives simply act as the voice of the students in the College (a la mode *Vox populi Vox Dei*). The Student Union advisory committee under the chairmanship of the Principal organised the student parliament for the first time in 2017-18. The in-charges of various college committees, elected representatives of the student's union and other students took part in this parliament to discuss the student-related issues viz. political, academic and interdisciplinary, and supported their social, economic and cultural interests. They promoted political awareness and a sense of social responsibility and equality among the students, and also supported the disadvantaged within the student community. In carrying out its responsibilities, the Student Parliament promotes the exchange of ideas within the student fraternity and is involved in issues such as societal participation, promoting sustainable development, and the application of scientific knowledge and temper, and the effects of these things on society and the environment. The student parliament also helps to resolve many of the immediate issues of importance related to scholarship, sports and other relevant things.
