

S.B.P. GOVERNMENT COLLEGE, DUNGARPUR (RAJ.)
Session 2018-19

Best Practices

1. Green and clean campus Our college tries to keep this campus green. Here are four units of NSS which with the collaboration of NCC, YDC, Rover and Ranger focus on this objectives to make this campus green and clean. NSS regularly performs these activities during their camps organised on different occasions. In order to meet out these objectives various committees such as garden maintenance, environmental maintenance and beauty had been regularly constituted by the Principal. College passionately follows the Bhartiya Swachchhta Mission initiated by Indian government. This college also has a clean campus committee that takes care of the quality of cleanliness within the campus. During NSS camp, volunteers of NSS clean the campus on 14/09/2018 and 16/12/2018 under the active supervision of NSS programme officers.

2. Mentoring System Most of the students of this region prefer this college over various private institution situated around and because of this reason SBP Government College represent the highest number of students. Since most of the students are from poor economic back ground therefore these students need help and support from this college. The faculty members of this college take care of students who are basically first generation learners. Faculty members are always ready to help them in their academic as well as in their personal problems. Youth Development Cell and Women Cell have been established to furnish these objectives. Actually all faculty members of this college play their roles as the mentors of these students.
