

S.B.P. GOVERNMENT COLLEGE, DUNGARPUR (RAJ.)

Session 2017-18

Best Practices

1. **Green Campus:** Our college always tries to keep this campus green and eco-friendly. Units of National Service Scheme are very instrumental in this task. They engage their volunteers to plant various kinds of plants and flowers in the campus to keep this campus green and environment friendly. These units organised a plantation programme in the inner section on 24th September 2016. Committees like Campus Beautification Committee also helps to maintain the natural beauty in the college.
2. **Special attention to the Students:** This institution has a maximum number of students from Schedule Tribe Community. In general these students prefer this college over private institutions. Our faculty members take care of these learners who come basically from very poor economic background. College family is always ready to help them in there academic as well as in there private issues maintaining full confidence required for the same. Youth Development Cell is also functional and it tries to help the students. College administration and teachers pay their role as the mentor of these students.
