## Meeting

A meeting of the IQAC members was held in the office of the principal incharge and chairman of the IQAC Cell on January 01, 2022 at 1130 hrs. This meeting was late because of another outbreak of Covid. The committee approved the minutes of the earlier meeting and made following observations

The RO system was installed in the building and is working satisfactorily.

The committee members visited the campus and found the height of boundary wall of south west side of the building should be increased with barbed wire for the safety of students as well as equipment. This work should be given top priority.

The committee members also observed that the south west side should be leveled so that its utilization can be properly monitored as well as once the leveling is complete we can make that area green by strategic plantation.

Following members of the committee were present
