SUB: Regarding engaging students as Interns for Corridor study in Ranthambhore-Ramgarh Corridor.

Dear Madam,

As you are aware that WWF India is working for last 20 years with the Forest Department of Rajasthan for monitoring species/habitat, ensuring corridor connectivity and community initiatives to involve communities in conservation. During this period we have supported and worked with the Forest Department for data collection and analysis for AITE surveys, Law-Enforcement, Camera-Trap and other ecological surveys etc. As much of our work is in forests and its periphery we have also obtained a long-term permission from the Forest Department.

We are planning to initiate survey in above mentioned corridor. It would be good if you can process our request and ask students who are studying in the field of wildlife biology. They can join short term internship with the organization. It will also help them in understanding the landscape and also they can gain knowledge which will help them in building their carrier in this field.

Thanks & regards

SUB: Requirement of Interns to support filed initiatives in Mukundra Hills Tiger Reserve and Kailadevi WLS.

Dear Madam,

We have been working in Sawai Madhopur and adjacent areas since more than two decades, primarily for the conservation of tigers, co-predators and prey as well as for promoting sustainable livelihoods for local communities. Recently, in 2012, we started the Western India Tiger Landscape programme, based out of our office in Sawai Madhopur. Now we have shifted our office in Kota and from here we are working in Western India Tiger Landscape.

This year we have planned to conduct camera trapping exercise in MHTR and in Kailadevi WLS for which we need interns, who can support in camera trapping and also learn advance techniques and tools used for tiger monitoring.

If there are any interested candidates who can join internship minimum for 3 months that would be great. For more details they can reach us directly.

Thanks & regards
