## Action Taken Report on Teachers feedback - 2020-21

Response/Suggestion	Action Taken
The curriculum should be job-oriented.	Designing a curriculum is not allowed at the college level by higher authorities. College follows the syllabus designed by the University of Kota, Kota. But the college has organized 2 training programs for students to provide skill development training to students.
Number and facility of smart teaching to be enhanced.	Whatever resources are available in the college is for students' welfare. Regarding smart teaching faculty members are free to use all resources for smart teaching.
Students should be motivated to earn while learning by giving some projects which can make them confident and self-reliant.	Students are motivated and guided to projects under the DST-KARYA scheme, where they are provided opportunities to work in reputed IITs, IIS, and various other institutes of high repute. Such a program helps the students gain confidence and make them self-reliant in the field of research in various fields.
Vacant posts are not filled timely. The teacher-student ratio is inappropriate,	Filling vacant posts in the colleges is a policy decision by the employer. But the college administration do all possible efforts to manage classes and workload by making alternate arrangements like clubbing the classes, online teaching, and by appointing guest faculties.
The infrastructure of science labs should be improved.	Recently college had received a grant under the RUSA scheme under which many laboratory equipment have been purchased and infrastructure have been upgraded. Now the laboratories in the college are equipped with more advanced instruments.
