2.7.1 – Student Satisfaction Survey (SSS) on overall institutional performance (Institution's questionnaire, results and details) (2017-18)

Student satisfaction survey was conducted in physical manner due to the unavailability of internet facilities with the students. The questionnaire was prepared and circulated to be filled by the students. Around 50 students filled the questionnaire; most students were satisfied by the method of teaching, basic facilities available to them and the faculty of the college. However, few students complained about the paucity of clean drinking water and number of toilets available. The complaints have been brought to the notice of administration and will be soon resolved. The students wanted enhancement in the sports facilities which has been taken up with the funds received from RUSA.

Students were happy with the number of course books available in the library but few wanted more magazines. Few students also complained about the shortage of teaching staff in the college
