

## **2 Best Practices:-**

**Title of the Practice:** Towards a greener and eco-friendly campus  
**Goal:** To keep the campus green and Clean. **The Context:** A number of trees to be planted towards fulfilling the goal and to provide grass cover patches over areas lying barren. The Eco Club is planning to plant more number of trees in the campus. The challenging issue is maintaining the planted trees because water is the main problem during summer months though we have a water harvesting system but even that fail during the summer season. Digging additional bore wells may solve the problem. **The Practice:** The Eco Club is working towards this issue in the campus. The members of the club involve NCC, NSS and Scouts Rover -Ranger student volunteers for tree plantation. Grass patches have been put in various places across the college campus under the supervision of the club. In addition other students are also involved on particular days so that everyone participates in this campaign.

**Uniqueness:** We ask the students to bring some seedlings or seeds from their homes or from nearby place and try to grow them in the college campus. The administration also helps the team to buy plants. **Constraints:** Water problem is the only major constraint in this but this can also be overcome by planting drought resistant plant species and using the water so obtained from water harvesting technique. **Evidence of Success:** The fencing of the lawn has been completed. By the order of Commissioner College Education under project of **VAN-MAHATSAV** already 350 plants have been planted and 20 dustbins were kept in the buildings at different places. Students are advised to keep their class rooms clean and they are following it so that the campus is dust and dirt free. The overall environs of the college have become much cooler and pleasant due to the aforesaid efforts.

**Problems Encountered and Resources Required:** With a very large no of Students enrolled at times, some pay less attention to advise due to which there

can be seen some unclean areas in some places at times but they are monitored and rectified at the club and the administrative levels. Similarly the survival rate of the planted trees also depend on the water availability for which water harvesting technique is being assiduously pursued in the college.

## **Best Practice II**

Title of the Practice: Promotion to Sports Goal: For over all development of the students as institution college believes in overall development of students and students usually are conscious of their academics but don't care much for physical fitness. We believe that "Healthy mind lies in healthy body". Most of the students come from the villages located in the close vicinity and their villages have poor transport connectivity, hence, students do not want to stay after regular classes but due to strong will power and keen interest in sports they stay for the games. The post of Director of Physical Education in lying vacant previous 8 years and the charge of this department is in regular faculty member so there is some difficulty but college faculty try hard to develop awareness among students and persuade parents for stay their wards in college for development of sports facility with minimum resources.
