Course/ Programme Outcomes

S.N O	PROGRAMME NAME	DISCIPLINE	COURSE OUTCOME	PROGRAMME OUTCOME	PROGRAMME SPECIFIC OUTCOME
1	B.Com.- Bachelor of Commerce	Commerce	The course exposes the students to various concepts of Commerce and analytical skills	The programme helps the student understand marketing strategies, entrepreneurship, banking system, economic theories, and accounting procedures.	The programme is very helpful to develop caliber of self-business capacity to generate employment. By the end of the programme the students are competent for business, banking jobs, accountant, office job, stock marketing and other competitive exams.
2	B.Sc.- Bachelor of Science	Science	The course contents are designed to provide exposure to the core subjects and equip the students for higher education.	To develop the understanding of logical thinking and address a problem through practical learning leading to reasonal conclusion	collaborate effectively on team oriented project, understand good laboratory practices and safety. create an awareness of impact of science on the environment society development outside the scientific community leading to sustainable life style.
3	B.A.- Bachelor of Arts	Arts	The B.A programme is a combination of three elective courses opted over a wide range. Each course has been designed keeping in mind knowledge, skills, human values and social issues of relevance.	The B.A programme has been designed with the objective of imparting the best of subject knowledge along with basic knowledge of environmental science	The insistence is on extensive knowledge to fight competitive exams and pursue higher studies. The curriculum design emphasizes human values and subject competence. The programme helps in in Holistic development of students, plays an important role in the accretion of

				and language. competency.	sensitivity, empathy and creativity in the students develops language skill, writing skill, soft skill, life skill and critical, logical thinking in students at the same time it flourishes, civic responsibility, environment consciousness, patriotism, patience, tolerance, spiritual claims, leadership quality teamwork and ideological soundness.
4	M. Sc – Chemistry	Science	<p>understanding of organic synthesis of organic reagents reaction like oxidation-reduction stereochemistry conformational analysis by organic chemistry pericyclic chemistry, understanding of thermodynamics kinetics steady state kind and application Quantum chemistry electrochemistry solid state chemistry, photochemistry and understanding of organic and inorganic photochemistry chemistry processes Redox reaction solar cell and junctions, understanding and application of coordination chemistry through different theories like cftm for orgel diagram, application of organic spectroscopy like animal UV visible IR mass in organic Spectroscopy like ESR spectroscopy, biochemistry provide any area to understand different biological process complicated by biochemical reactions energy absorption</p>	<p>enhance the scientific temper among students so as to develop a research culture and implementation of the policies to tackle the burning issues at the global and local level to develop research oriented skill, enhance teaching ability among the students to serve the Nation in a better way, find out green route for chemical reactions for sustainable development, make a wide and handle the sophisticated equipment.</p>	<p>After completing MSc chemistry chemistry program student will be able to create awareness and sense of responsibility towards the environment and apply knowledge to solve issues related to environment pollution and climate change, apply knowledge to build up small scale industries like natural product Pharmaceutical die textile polymer petroleum products forensic. interdisciplinary approach of the subject will provide a wide area of research. It would help students to communicate scientific information in a clear and concise manner. applied the knowledge to develop the sustainable and eco-friendly technology in Dust in industrial chemistry.</p>

			and utilisation role of enzyme and many more		
5	M. Com – Accounting	Commerce	<p>To enlighten students about activities in the field of Commerce like - banking, insurance, communication, transportation and business. The course develops an understanding of Commerce to solve the problems and the unfamiliar events in specific condition, to gain maximum output with maximum effort and time is called skill. Students learn the skill of making charts, maps, graphs and diagrams related to commerce. To develop positive attitude in the students is the attainable goal of the commerce education because students can progress only with a positive attitude.</p>	<p>Commerce education is basically program of economic education that concerns the availability, saving and expenditure of money. Students learn facts, terms, laws principles and methods used in the field of Commerce</p>	<p>After completing the programme a student can self employed himself by starting his own business. He can be successful in the field of Banking insurance income tax and accountancy and other competitive exams.</p>
6	MA – History	Arts	<p>The main focus in the history course at the PG level is on the stages the growth of human Civilization and the evolution of social systems and on cultural and scientific development to promote an understanding of the processes of change and development through which human societies have evolved to their present stage of development to promote an understanding of the common roots of human Civilization and an</p>	<p>The masters in history furnish the student with all necessary course content related to civil services and competitive exams. The content designed covers Twentieth Century World, Cultural Profile of India, Women in Indian History and Social and Economic History of Rajasthan. The historical</p>	<p>The Specific Outcomes focus on the Detailed History of India and Socio Economic Life and Institutions of Ancient India from Earliest Times to 1200 A.D. The Special Papers Like Elements of Indian Archaeology and Epigraphy, Indian Art and Architecture also adept the students for number of direct job opportunities and for all competitive exams.</p>

			appreciation of the basic unit of mankind	application in tourism is also a well -designed course.	
7	MA – Political Science	Arts	The course covers various aspects and dimensions of political philosophy, political thinkers, world organizations, political institutions, constitution, various types of governments and their functioning, state and non-state affairs	By the end of the programme the students are able to interpret Western Political Theory From Plato to Marx, Comparative Political Institutions, International Politics, Theory and Practice of Public Administration, Modern and Contemporary Political Theory and Indian Government and Politics. The programme is designed to develop competence of the learners for all competitive exams.	By the programme students understand the inter relationship of politics with history and economics . They attain knowledge of democratic politics, understand the constitutional provisions, amendments, world politics, national politics that results in responsible and active citizens of the nation.
