PREFACE

This book includes insect varieties found in Rajasthan. Insects are classified in the Insecta class of the Arthropoda phylum. The main objective of this publication is to provide collective information on insect bio-diversity to academicians and students. This book presents the general Insect Biodiversity of Rajasthan.

The insect biodiversity of Rajasthan is very rich. There are insects of many orders like Orthoptera, Isoptera, Hemiptera, Lepidoptera, Diptera, Hymenoptera, Coleoptera etc. Ants, butterflies, moths, wasps, grasshoppers, flies, bugs, beetles, bees, and termites are found in abundance in this area.

A total of 18 chapters have been prepared by the author in this publication. In these chapters, along with the description of insects, their photographs are also given. All the photographs of insects presented in the book have been clicked by the author. This publication has been prepared by the author with a lot of hard work; hope this volume will be informative for all.

This book has been prepared with the help of all my respected teachers, so I thank all my teachers from the bottom of my heart. I also thank my friends and colleagues who have supported me in this dream work.

I also give special thanks to my family.

Hans Raj Parihar
Assistant Professor

Contents

Sr. No.	Chapter Name	Page No.
1.	Introduction of Insects	1
2.	Chapter 1 Ants	4
3.	Chapter 2 Butterflies	8
4.	Chapter 3 Beetles	18
5.	Chapter 4 Bees	27
6.	Chapter 5 True Bugs	31
7.	Chapter 6 Crickets	39
8.	Chapter 7 Cockroaches	46
9.	Chapter 8 Dragonfly	48
10.	Chapter 9 Flies	51
11.	Chapter 10 Grasshoppers	56
12.	Chapter 11 Human Louse	62
13.	Chapter 12 Moths	65
14.	Chapter 13 Mosquitoes	69
15.	Chapter 14 Mantis	72
16.	Chapter 15 Silver fish	76
17.	Chapter 16 Stick Insects	78
18.	Chapter 17 Termites	81
19.	Chapter 18 Wasps	85
20.	References	91
