# Future plan of action

- ▶ Increase emphasis on experiential and holistic learning by
  - Organizing workshops, seminars and expert's lectures.
  - Motivate students for startups and research activity.
  - Student- industry linkages.
- ▶ Continue leveraging use of technology for faculty – student interaction, enhancing student learning process.
- ▶ Strengthen department – alumni engagement.

# Program Outcomes of EAFM

## PROGRAMME OUTCOME OF THE M.COM. EAFM

The M.Com EAFM Programme provides the students with the knowledge of finance and economics. This course covers all the topics related to economy and financial bond, in which monetary economics reflects the currency situation in the country. The topic of financial management provides information regarding finance and economic growth and development which models should be used in the economy of the country so that economic development is possible. Public finance subject puts the entire financial system of the country in front of the students and bank subject is beneficial for the students. If seen in a nutshell, the Economic Administration and Financial Management course enhances the decision making ability of the students in relation to economics and finance.

## PSO-1 1. Business Economics:

The subject of business economics helps the students to determine the market economy and firm's price and output. Business economics helps in establishing relationships between different economic factors, such as income, profits, losses, and market structure.

## 2. Financial management:

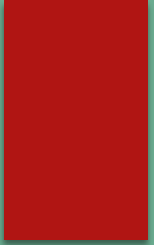

Financial management deals with managing the financial aspect of a business and helping them to achieve the goal and objectives.

### 3. Monetary economics:

monetary Economics subject is helpful to understand different competing theories of money. Monetary economics provides a framework for analyzing money and its functions.

### 4. Indian financial system:

Indian financial system subject provide knowledge about Indian economy . Indian financial system subject provide knowledge about financial institution including banks, insurance companies ,fund etc. it encourage both saving and investment.

This course will enable the students to combine practice and theoretical knowledge of business economics. The students will be developing an awareness of the competitiveness of the environment in which the firm operates in different markets. They will also be aware of the different competition to deal with the consumer, cost, and scale of production and maximize customer satisfaction with the highest profit & wealth.
