

## Institutional Distinctiveness

In a distant and rustic realm, the proud edifice of Govt PG College, Kekri's roots firmly planted in the soil of tradition, embarked on its noble journey in 1977. Initially offering a commerce undergraduate program, this esteemed institution blossomed with the passage of time, spreading its branches to encompass a plethora of undergraduate disciplines and postgraduate studies in a selective seven subjects. Three of these postgraduate courses fall under the realm of science, while the remaining four courses pertain to the faculty of arts.

Despite grappling with economic constraints in the impoverished and secluded countryside, this college espouses the sacred principles of the ancient Gurukul education model, thus shaping the destinies of countless students who pass through its hallowed halls. It boasts an array of distinctive features that set it apart from the mundane world.

Firstly, Kekri has garnered recognition as a recently christened district by the esteemed Rajasthan government. This formidable institution welcomes this challenge with open arms, for it aspires to ascend into the realms of greatness as an eminent institute of higher learning.

Moreover, the college fervently endeavours to erect comprehensive sporting facilities, including a sprawling 400-metre athletic track and a serene walking path. The wise custodians of this sanctum believe that engaging in sports can engender a nurturing of the innate human virtues that lie deep within the hearts of youth.

Additionally, under the auspices of India's governmental initiative, a momentous educational visit had been orchestrated in November 2022. This lofty undertaking entails the heartfelt integration of 122 young intelligent girls hailing from a myriad of learning establishments. They shall be cordially introduced to the college's esteemed admission policies, digital scholarships, the National Service Scheme (NSS), the fabled placement cell, and a plethora of noteworthy projects that thrum with promise and potential.

In the realm of scholarly pursuits, young maidens in the 12th grade were granted the privilege of witnessing the grandeur of the scientific realm, encompassing the faculties of zoology, botany, chemistry, physics, and geography laboratories. The illustrious establishment also boasted a well-stocked library teeming with a staggering collection of 26,000 books and periodicals, which was diligently imparted to all the students in attendance. With great conviction, these promising young women pledged to steadfastly pursue the path of knowledge, ensuring the growth and prosperity of this esteemed institution. In the nascent Kekri district, this college assumed the role of mentor, guiding and overseeing the activities of eleven private institutions in matters such as NOC and undertaking various responsibilities. Holding the mantle of higher education in Kekri, this institution reigned supreme with the presence of nine government colleges under its leadership.

Operating under the auspices of the RACE program, the esteemed governing body formed a DRAC committee, entrusted with the welfare and development of these aforementioned government colleges. Presently, the college administration also dedicates its energy towards monitoring and managing the affairs of four additional colleges, namely Tantoti, Sawar, Kadedda, and the Government Agriculture College in Kekri. Thus, acting as a guiding light for all educational institutions, we assume the roles of leaders and elder siblings.

Situated approximately 150 feet away from the bustling main road, the college building occupies a realm of tranquility, forging an environment reminiscent of Tagore's tranquil abode, Shantiniketan. Adherence to the discipline of maintaining a serene ambience allows students to revel in a world free from distractions and noise where they can reflect, meditate, and find inner peace.

The institution possesses a profound understanding of the significance held within every droplet of water, as evidenced by the presence of a water harvesting plant. In an effort to ensure the utmost utilization of each precious droplet, the theme of "Jal me hai Narayan" is fervently propagated amongst the students. Furthermore, students are educated on the National Water Mission and the National Mission for Strategic Knowledge for Climate Change, with the aim of minimizing all losses resulting from the effects of climate change.

The students' character is shaped through a fusion of daily accomplishments in the spheres of arts, science, and literature, as well as teachings derived from revered Indian scriptures. Within this college, education, culture, and general knowledge are interwoven harmoniously, fostering an environment conducive to growth.

Moreover, the institution has undertaken extensive endeavors in tree planting and the preservation of biodiversity. Curiously, a garden dedicated to the cultivation of medicinal and Ayurvedic herbs is being developed within the science block. However, it is in its infancy, with soil of the highest quality being carefully poured into the garden.

Despite facing the constraints imposed by limited resources, the college successfully conducts examinations for approximately 5,000 students affiliated with Maharshi Dayanand Saraswati University. As the new district of Kekri is formed, the college ascends to the position of a premier educational institution for the prestigious Rajasthan Public Service Commission main examinations. Remarkably, some of the college's faculty members serve as esteemed members of the BOS at MDS University Ajmer, contributing significantly towards the development of the curriculum in accordance with the guidelines outlined in NEP 2020. Moreover, certain faculty members have made vital contributions to the confidential workings of the RPSC.

The college exudes a celebratory spirit, commemorating a multitude of festivities, birthdays, and special days alongside the students. This festive-oriented atmosphere perpetuates an enthusiastic ambience among all members of the college community.

The college takes great pride in declaring its campus a tobacco-free zone, with every member and student wholeheartedly abiding by this commitment. Devoted to innovation and modernization, the institution boasts the presence of a 20-kilowatt solar plant, leading to substantial savings and harboring grand aspirations for a future illuminated by the blessings of the Sun God through the utilization of solar energy.
