Report on Tree Plantation (My Earth My Duty)

Every man needs the oxygen for his life and trees are the foremost source of oxygen as well as trees help to reduce the level of CO₂.

As we know that the whole world is facing the problem of global warming and to recover from such a problem, planting the trees has become one of the most important today's aspect.

Government College Rajgarh (Alwar) organized a tree plantation program in the month of July. All the students and teacher participated in this program. The aim of the program was to plant a total of 500 saplings on the college campus and nearby local areas. One by one students and teachers started planting sapling in the garden of our college campus and after that, we planted sapling in the nearby local areas of our college. Students also made some banners on the importance of tree plantations. We passed banners in the area around our college. So that people read these and know the importance of tree plantation.

Planting trees around the college is very beneficial as plants help to reduce mental stress, keeps the surroundings fresh, brightens up the surrounding, give beautiful appearance purify air etc.

The clean and green ecosystem provides us with fresh air and pollution is also reduced. We can save the planet by conserving trees, natural vegetation, water, natural resources, electricity and other resources. To control environmental pollution and global warming, we must strictly adhere to all available measures.

Report on tree Plantation

7.1.2 Report on an Event of Plantation in and around Government College Rajgarh

On the 150th Birth Anniversary of the Father of the Nation, Mahatama Gandhi Government College Rajgarh organized an event on tree plantation. Ex-principal Dr. Umesh Mridul was invited as chief guest. All staff, NSS Volunteers and other students were present in the college ground. The program aimed to plant about 1000 saplings in the college all around as well. The invited guest guided students on how to sow seeds and plants. Teachers also participated in that event to help students. At first the students started to implant, seedlings, along the main road of college and then along all side of the main ground, in the play ground, in front of the library and girl's hostel. After that the students planted in local areas nearby our college. Some charts and banners were also designed by the students relevant to tree plantation. These posters were hung there to raise awareness in the people about the need of tree plantation. When the students achieved their goal to plant 1000 plants, they came back to college. The principal welcomed them and motivated them with a passionate speech on tree plantation. In the end the principal thanked the chief guest as well as teachers, students for coming and participating in that fruitful activity giving their precious time. Overall this was an excellent and glorious event for all. Everyone felt inner peace by something good for his nation. Finally the event ended and the students went home with enthusiasm and happiness after doing such great work.

The objective of this event was to teach students how we can save our climate from pollution. This was a great initiative to make our atmosphere neat and clean. By tree plantation, we can develop a climax ecosystem free of green house gasses to reduce global warming.
