### Major Outcomes of Fair:

To know the interest area of students “Career choice Form” were filled by students 20 days before the fair. And accordingly we did the counselling. Those who have shown interest in Research area were called and counselled for “Summer Research Fellowship 2018” in various institutes. Most of the students want to prepare for competitive exam and least interested for industrial job.

Most of the organization has shortlisted the Bio data/CV. Later on they will call for interview. According to their job interest we provided CV to Banking sector, LIC, skill academy and industries. So, they can call for interview in near future.

More than 700 students of undergraduates, ITI and postgraduates gathered to get information about various job offer and skill development courses and get the benefited. As, the first time in this fair industrial sector (Alwar district), DIC, RIICO and MSME was incorporated. But students didn't show much interest. So, it will take time to create awareness among youth. Most of young generation do not believe to become entrepreneur they aspired for govt. job to private sector job. The prevailing culture in middle class Indian people emphasizes on stability and job security over risk taking. The salary and stability of job is perceived as to preparing for marriage. So, mind-set of students and parent is toward Job security either in govt. sector. The students have shown least interest for taking job in industrial sector. To create interest among students the career counselling should be done from the first year. According to their interest we should do the counselling session. To create interest some Industrial visit could be planned so they understand the nature of work and its environment. More interactive session by entrepreneur have to be planned in near future and some preliminary course can be started to create awareness, promote the self-employment culture.

**Future Plan:** The database of interested students will be kept in college records and can be provided to recruiters when required. One has to be in continuous contact with them. And students were asked to update their CV and send us soft copy so, can be send to organization HR department.
