## Mechanism of Continuous Internal Assessment

The institute follows the regulations of the University of Kota, Kota for the internal/external evaluation process for the theory & practical subjects. The internal assessment of students for Undergraduate students is assessed through class tests and practical, for postgraduate students are assessed by the midterms, assignments, and project works.

Some specifications related to internal examination are as follows:

- Class tests, monthly tests, and practical internal assessments are conducted for undergraduate students at the department level.
- Three internal assessment tests are conducted in each semester for postgraduate students at the department level.
- The internal assessment timetable of each department is attached to the teaching plan. Time table for the test is prepared well in advance and communicated to the students earlier and it is displayed on the notice board.
- Each department conducts midterms, seminars, project work, and assignments with a max mark of 15.
- After evaluations of internal assessment answer scripts, the marks are updated on the online portal of the University of Kota, Kota.

## Sample paper of internal Assessment

**JDB Govt. College Kota**

**M.Sc. (Sem. I) Assignment, 2022**

**MATHEMATICS**

**Paper-Math 1 C(II)**

**(Complex Analysis)**

**Max Marks-15**

There are seven questions; students are instructed to attempt five questions. Each question shall be of three marks.

1. Write a short note on Stereographic Projection.
2. If  $|z - 2 + i| \leq 2$ , then find the greatest and least value of  $|z|$ .
3. Find the fixed points and the normal form of the following bilinear transformations:  
(1)  $w = \frac{3z - 4}{z - 1}$                       (2)  $w = \frac{3iz + 1}{z + i}$
4. Prove that the function  $f(z) = |z|^2$  is continuous everywhere but no where differentiable except at the origin.
5. Show that the functions  $f(z) = e^{z^{-1}}$  ( $z \neq 0$ ) and  $f(0) = 0$  is not analytic at  $z = 0$ , although Cauchy-Riemann equations are satisfied at the point. How would you explain this?
6. Show that an analytic function with constant modulus is constant.
7. If the mapping  $w = f(z)$  is conformal then the function  $f(z)$  is an analytic function of  $z$ .

**JDB GIRLS COLLEGE KOTA**

M.Sc. II Semester Assignment

**MATHEMETICS**

Paper V

**DISCRETE MATHEMATICS**

2021-2022

**Total Marks : 15 Marks**

1. Draw truth table for  $(p \wedge q) \vee \sim (p \vee q)$ .

Or

$p$ :Mona learns Math

$q$ :Mona will find a job

Express the statement  $p \rightarrow q$  in English.

2. Prove that  $(n + 1)^2 \geq 3^n$  if  $n$  is a positive integer with  $n \leq 4$ .

Or

Use mathematical induction to prove that  $n^3 - n$  is divisible by 3 .
