National workshop on IPR and Awareness

JDB Govt.Girls College Kota

Date 19 February 2020

Report

The program started with the traditional Saraswati Vandana and welcoming session. Dr. D.C. Joshi honorable vice chancellor of Agriculture University Kota was welcomed by the principal Dr Sangeeta suneja and other distinguish guest by different committee members. After this welcoming session, the principal, Dr Sangeeta Suneja addressed and welcomed the guest and the participants. Then Dr. Vijay Devra presented a pithy introduction of IPR. Brief objectives of the workshop were described by her, here, topics of the different speakers were also introduced in nutshell. The Project Director DST Dr. Bhuvnesh Sharma delineated the importance of IPR for the students and the research scholars, he told that, for this purpose, a policy was applied last year for the students. After his short speech, the assistant director of college education Kota, Dr. K. M. Gavendra addressed the audience. He expressed his happiness over the growing scenario of workshops and conferences organized in the different colleges of Kota. He laid stress on research and innovations. He was happy to aver that marketing of the innovations are being organized by commerce, specifically management departments, after the rise of globalization. Then Professor D.C. Joshi, Vice Chancellor of Agriculture University Kota, deliberated over the various measures of protecting intellectual properties. He proponed that intellectual properties does not diminish, they will not reduce, they will increase. He couched that the intellectual properties need protection and require incentives and benefits. He developed his speech by saying that as the generations pass, creativity increases, solid outputs like music, art, songs, poems, paintings, and sculptures etc. grow.

Dr Joshi opined that if the hard disc of mind is full, creativity cannot take place there. Automobiles and machineries have developed a lot as the time has passed.

Registration through patent, copyright and Trademark is necessary. New ideas should be read, thoughts should be shortlisted. He also threw light over start ups, mobile apps, software's, saying that these are also to be protected. People cheat even friends while copying their ideas, we are not serious about this. The scenario is changing every 10 years. He concluded giving tips that one should use, protect, sell and grow. This inaugural session was anchored by Dr. Fatima Sultana.

The first speaker, Ms. Sukku, a senior patent agent spoke on patent first. She conferred that it is a right in exchange of one's innovations in inventions. The evolution of Technology can also be patented along with medicines etc, there are some accidental innovations and inventions which also need protection rights. Concepts and inventions against the nature cannot be patented. She told us that a new use of the earlier product cannot be patented. The literary, dramatic musical outputs are to be protected under copyright, not as patent. Specifications can also be claimed first and the main claim should cover all the components and the new parts. The type of application was also described by her, she told us that the date is very important while filing provisional application and it is necessary to complete application within 12 months. This session ended with madam Sukku's details over e-filing of application, process of patent grant, step by step and vividly concluded through slides. This opening session was anchored by Dr. Fatima Sultana.

The second speaker Dhruv Mathur presented his deliberations on Industrial Designs- Introduction Identification and Filing process. He informed us that there should not be shade and reflection over the picture of the article to be registered. He clearly delineated the design registration process. He stated that application number, registration number and date of filing is important. Some interesting designs by Steve Jobs were also deliberated true PPT. Graphical user interface cannot be registered in India but in US. This classification was depicted through a tabular form on the screen. Research and development should not be used indiscriminately. The disclaimer also plays a very important role in filing registration process, we were informed by him. While explaining judicial interpretation of design

infringement, he said that an early advertisement can hazard the design registration. The penalty process was also discussed in this session. This technical session anchored by Dr. Pratima Shrivastav.

After lunch break, in next technical session the third speaker Prateek Singh delivered an informative presentation about copyright. He told us that ideas cannot be copyrighted. He informed us that if one has not been registered as a worker first over a certain product, but has been using it earlier, he will be preferred in the ownership of the copyright. While relating the procedure for registration of copyright, he said that manuscript can also be registered for copyright. Software's can also be considered as a literary work. In presentation he also discussed registration of mobile apps and websites.

The last eminent speaker Dr. D.K. Palwaliya Dean Academics Rajasthan Technical University shared his views on Novelty Search. He started from the origin of the copyright act and its growth. He told about the authenticity of inventions. In this, he played a video to establish the theory of Novelty Search. He exemplified that through structure and keywords we can reach to the novelty in an output. He further informed us that catchwords also play a valuable role in this process of finding the copyright or patent. In his deliberation he told us that through search and question answer method we can go to the proper ownership of the copyright holder. Here, in this session, the stage was handled by Dr. Arti Shah.

After this, stage was handled by Dr. Smriti Johri valedictory session. Dr. Shuchita Jain, co-convenor concluded the whole day deliberations and vote of thank conveyed by Dr. Vijay Devra, convenor the workshop.
