

2.7.1 STUDENT'S SATISFACTION SURVEY

Overall performance based on questionnaire, results and other details for session 2022-23

The survey (SSS) was conducted both online as well as with the questionnaire in physical manner. The most of the students are from rural background and therefore did not have enough internet facility at their disposal, therefore the survey is primarily on the basis of feedback form of the college filled by them. These forms were filled by more than 50 students. Most of the students attend the college regularly and are also satisfied with teaching, college faculty and administration, however some students admitted that they do not attend the college regularly possibly due to lack of proper communication facilities from the remote places they reside.
