Chemistry Lab

Laboratory Infrastructure for Department of Chemistry:

- **3** Chemistry laboratories are situated at science block. Each laboratory has five sections. Qualitative laboratory, quantitative laboratory, instrument room, preparation room, store room.
- Qualitative laboratory has different reagents and few instruments for qualitative analysis. We have quite a number of expensive spot reagents which are used in the analysis.
- Quantitative laboratory on the other hand is equipped with analytical based equipments and reagents.
- Some of the analysis is also done by digital instruments. Each laboratory can accommodate 25- 30 students.
- Instrument room is well equipped with digital instruments required for students like sophisticated weighing machine, digital colorimeter, potentiometer etc. Also we have UV-VIS spectrophotometer and other sophisticated instruments in DST laboratory.
- Each of the laboratories has gas and distilled water connection.
- For safety inside and outside the laboratory is equipped with fire extinguishers.
- The department also runs PG courses since 2017-18 with well equipped modern laboratories.
