Model Answer Paper

CS-209

Q.1 Write a program to find factorial of any number in javascript.

Q.2 Write the syntax of if-else & for loop in Perf.

Q.3 Draw this pattern of frame

Ans-1 `<HTML>`

`<HEAD>`

`<TITLE> web page </TITLE>`

`<SCRIPT type = "text/javascript" >`

`var i;`

`var n;`

`n = eval (Prompt (" enter term "));`

`var fact;`

`fact = 1;`

`for (i = n ; n >= 1 ; i --)`

{

fact = fact * i ;

}

alert (fact) ;

<script>

< /script>

<body>

< /body>

< /html>

Ans-2. Perl language में सबसे variable के
अर्थ में समान होता है।

Syntax:

if - else .

if (condition)

{

code to be executed ;

:

}

else

{

code to be executed .

}

for loop

```
for (init ; condition; increment (decrement))  
{  
  code to be executed ;  
}
```

Ans - 3

< HTML >

< head >

< title > web page title >

< / head >

< frameset cols = " 50% , 50% " >

< frame src = " a.html " >

→ frame के src में जल्दी सही value का page
पहले से बना होना चाहिए।

< frameset rows = " 50% , 50% " >

< frame src = " b.html " >

< frame src = " c.html " >

< / frameset >

< / frameset >

< / HTML >
